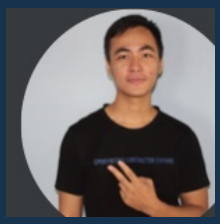
Dong Van Truong

E-commerce Full-Stack Developer

Hoi An, Quang Nam, Vietnam | 0932505591 | truongdong1117@gmail.com | linkedin.com/in/truong-dong-a4b496142



PROFESSIONAL SUMMARY

E-commerce developer with hands-on experience building Magento 2 features and integration workflows, plus frontend work with Hyva/Alpine.js and custom WordPress themes and plugins. Comfortable working across PHP, JavaScript, SQL, HTML/CSS, and Docker-based local environments.

TECHNICAL SKILLS

Magento 2 & integrations

Custom modules, Adminhtml, DI, plugins, observers, declarative schema, cron, product/order/stock workflows

Frontend

Hyva concepts, Alpine.js, Tailwind CSS, JavaScript, responsive product-detail interfaces

WordPress

Custom PHP themes and plugins, WooCommerce enhancement, booking/contact flows, theme configuration, translation-ready UI

DevOps & tooling

Docker Compose, Nginx, PHP-FPM, MySQL, OpenSearch, Git, Composer, npm

PROFESSIONAL EXPERIENCE

PHP Developer | Commercers VN Co., Ltd 2020 - Present

- Develop and maintain Magento 2 features and extensions for e-commerce storefronts and administration.
- Implement backend workflows, database-backed functionality, and frontend interface improvements.
- Investigate defects, support maintenance work, and collaborate with the team on requested enhancements.

Freelance Magento Developer | Asia Investment Consultant Advertising Trading Company Limited June 2022 - Aug 2022

- Set up Magento environments and delivered feature additions, fixes, and ongoing system maintenance.
- Supported website implementation and operational needs across the Magento stack.

EDUCATION

B.Sc. Physics, Excellent (with Honors) | Graduate of Hue University of Education | 2015 - 2019

SELECTED TECHNICAL PROJECTS

Magento 2 Integration Modules

- Built and extended integration capabilities for product, stock, order, invoice, credit memo, and shipment workflows.
- Worked with Adminhtml profiles, scheduled jobs, REST/HTTP communication, FTP/SFTP connections, file processing, and CSV/XML/JSON/TXT/PDF converters.

Hyva / Alpine.js Product Detail Page

- Implemented a Magento-shaped product-page experience using Alpine.js: configurable options, pricing and gallery updates, stock states, quantity handling, and add-to-cart feedback.
- Applied Hyva-style browser events and private customer-section data patterns for cart, wishlist, compare, and messages.

WordPress Theme & Plugin Development

- Worked on custom WordPress themes and companion plugins for travel, spa, and flower-shop sites.
- Implemented responsive UI, WooCommerce-aware product presentation, booking/contact workflows, theme settings, and Tailwind asset builds.

Dockerized Magento Development

- Configured local Docker Compose environments with Nginx, PHP-FPM, MySQL, and OpenSearch for Magento development and testing.

CORE TECHNOLOGIES

PHP, Magento 2, JavaScript, Alpine.js, Hyva, WordPress, WooCommerce, MySQL, HTML, CSS, Tailwind CSS, Docker, Docker Compose, Nginx, PHP-FPM, OpenSearch, Git, Composer, npm
